

JOHN GRAY'S
MARS • VENUS...

17

As a writer I research the complexities of the human mind and its central role in overall health. One science that has illuminated my lifelong research for an effective way to reliably treat all people simply is homeopathy. It has seemed like a new miracle even though it is over 200 years old.

Often conventional medicine even with its high technological expertise isn't as capable to treat conditions that homeopathy heals very quickly and without great expense.

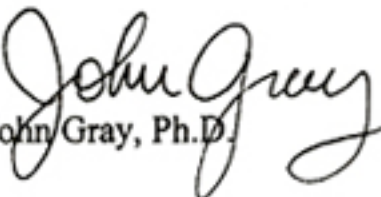

Hopefully this book will begin to illustrate homeopathy's importance in medical history. The reader will look through what seems to be a magical window to a long sought for view of life that is beautiful, healthy and harmonious.

Dr. Farahmand, who has set out to revolutionize homeopathic medicine, works in a way that is uniquely his own. He quickly pinpoints one's problem and immediately addresses the cause.

Conventional medicine never thought to link many health symptoms I had to a brain concussion I had experienced years ago. Dr. Farahmand easily found and healed this concussion and other related symptoms with a 6 week treatment.

For me as a researcher, I always try to penetrate complicated angles of thought, sense and will within the human mind.... Homeopathic medicine shows me an exciting hope for mankind's future.

Sincerely,

John Gray, Ph.D.
