

7/22/2007

Dear Dr. Salar Farahmand

I am writing this letter to express my gratitude for the acne treatment that was provided to me. I began treatment August 2006. I had severe acne on my face for more than 5 years. It was frustrating to me because I had previously used over the counter products and they did not work for me. When you tested me and I began to take the medicine I was doubtful that it would work on me. After a few weeks I began to notice a difference. The acne had dramatically been reduced. My face never looked better.

I was not a stronger believer in alternative Medicine but now I am. I gladly recommend anyone to try it and see the miracles it can work for him or her. I am very thankful for everything you have done for me.

Sincerely,

When I started my treatment there was a big difference on my face. My face is just red but there no pimples (Acne). It took couple of months. What I am working on is to get my normal skin color. What I am really happy that I don't have bad acne. DR. fixed my problem.

Dear Dr. Farahmand,

*would benefit from*

I am writing to document my success with your homeopathic treatments and various therapies over the last several months.

Initially, I met with you in March 1999, complaining of sleeplessness, depression, fatigue, anxiety, and a general feeling of malaise. You prescribed certain medicines and gave me magnet therapy and acupuncture and within a week my symptoms were completely gone. I experienced restful sleep, the depression lifted, my energy level increased and my outlook on life noticeably improved.

During additional visits, you treated me for allergies and severe back pain. I have been virtually free from allergy symptoms all summer, and within a half-hour of being treated for my back pain I was pain-free.

You also treated my son Jonathan for dermatitis on his face. Upon finishing his homeopathic remedy his dry patches cleared up and have not returned. Prior to being treated by you, he had been treated with several topical lotions and medications that did not improve his condition.

Your staff has been very accommodating with my appointments as I live out of town, and you have been gentle with your treatments. I have not experienced such great successes with traditional doctors and medications and am grateful for your commitment to homeopathy and the other healing arts in which you are skilled.

Yours truly,
