

To whom it may concern,

I began seeing Dr. Farahmand in February of 1998. I came to see him after having seen a gynecologist on January 28, 1998. I went to see her to have a pap smear and exam, as I was having extreme pain during intercourse with my husband. I had had a history of female problems following my three-cesarian births, that concluded with a hysterectomy in November of 1994. They left my ovaries in tact as I still had healthy ones.

During the exam Dr. Taylor found two extremely large masses, and sent me to have an ultrasound on January 30th. They found two large masses, one grapefruit size on the left ovary, and orange size on the right. There was also clusters surrounding them. She received the results and called me to schedule me for surgery. I told her I wanted time to think about it and to research my options.

In my inquiry I called one of my dear friends, Leslie Faucher, to ask for any insight into the matter. She recommended Dr. Farahmand as she had an occasion to see him with female problems, and had taken her daughter to him countless times, with great success, for childhood maladies.

The doctor saw me in February of 1998, and began treatment, combining homeopathy, acupuncture, and magnetic therapies. After seeing Doctor Farahmand for close to six months, he suggested I go back for a followup ultrasound. I phoned my gynecologist and had her order me the ultrasound. She phoned me up with the results, and told me the masses had decreased in size by half, and whatever I was doing should be continued.

By 1999 I had complete success with the doctors treatment, and have seen him periodically for other problems, and have brought members of my family to see him as well. I appreciate his dedication to the healing arts.

To whom it may concern:

I have been one of the first patients of Dr. Farahmand for years and because of his right and on time diagnose of my problem and the significant use of Homeopathy or acupuncture was survived from serious diseases including:

- Sinusitis, which for years I was forced to take strong antibiotic for, and by dr. Farahmand's help, no sign of the sinusitis for 10 days is shown.
- Chronic colitis that had cause diarrhea, external bleeding or abdominal pain, and even by referring to digestive system's doctor and using all kind of medicine they prescribed and doing colonoscopy there was no recovery, but finally Dr. Farahmand was able to cure my colitis and all the diseases that had appeared because of it.
- After one year I was suffering from sprain in my knee which in order to release from the pain I had constant injection of corton for a long time and even one Doctor told me that I need surgery. The pains in my knee prevent me from walking and working and it was very suffering for a long time. This time just like other time Dr. Farahmand was my only savior and without any surgery he was able to cure me and the pain was gone forever.
- As time passed I was told after MRI and 3 scans that I have a mass or a tumor in my upper part of my right lung and was prescribed to use hydrocortisone 60 mg. a day for 6 month, it was actually diagnose to be a yeast by Dr. Farahmand and in 12.10.2001 in my fourth and last cat scan doctors resulted that there is no problem about my lungs and I am completely healthy.

For every thing I suffered from Dr. Farahmand was patiently by my side and guiding me. Trough his prescription the sickness would disappear and energy would follow. His prescriptions made my high body energy level to show me the wonders of a sweet, beautiful life.

Sincerely

To whom it may concern:

I would like to inform the public about my experience with Dr. Salar Farahmand for the past two years. I am honored to have the opportunity to meet with Dr. Farahmand two years ago. I am an advanced breast cancer patient and originally was diagnosed eleven years ago at age thirty. I went through Radical mastectomy and six months of Chemotherapy in 1990. I was in remission for three years and then my cancer came back in my bone in 1993. I once again, went through Radiation therapy and put on Tomaxifin to stop the spread of cancer. In 1996, another sight in my bones was affected and my oncologist put me on different hormone therapies. Lastly, my oncologist changed my medication to a new one in 1999 due to my excruciating pain and I was told that cancer cells attacked a new area in my bones. I met with Dr. Farahmand in 1999 and he diagnosed that there were twelve crucial minerals deficient in my body and prescribed those minerals for me. Surprisingly, in a short period of six months my body reached the normal balance of these minerals and my agony and pain from the brittle bone structure was subsided. I would like to share with the public the incredible experience I have had with Dr. Farahmand and ask people to give themselves a new chance to better, healthier and joyful lives with the miraculous yet, unbelievably safe and simple method of homeopathy of Dr. Farahmand. My cancer is in remission and I continue to be under Dr. Farahmand's care for an efficient maintenance program. I feel energetic and happy once again in my life and like to share my success through this powerful and effective treatment with people who want to heal themselves from diseases they face.
